This tutorial will walk you through changing your carrier logo using iPhonebrowser. This tutorial assumes a few things:

- Your carrier is either Tmobile, ATT, Cingular, Vodaphone.
- You have downloaded and installed iPhonebrowser
 - http://code.google.com/p/iphonebrowser/
- You're using Windows
- The image you want to use for your carrier logo fits the standard logo dimensions
 - o 65x20 pixels
 - I believe the optimal resolution is 300 pixels/inch
 - Don't quote me on those dimensions but it's always worked for me.
 - The image file must be .png file.

Let's get started.....plug your phone into your computer and launch iPhonebrowser. Once you're connected you get this screen.

Navigate (click on the folders) to the following directory:

- System
 - Library
 - CoreServices
 - Springboard.app (everything is done in this folder)

Use the scroll bar and scroll down until you see the file 'Default_CARRIER_YOUR CARRIER'

- **YOUR CARRIER** = Whomever your service provider is
 - Example : If your provider is TMobile you would look for the file called: Default_CARRIER_TMOBILE If your carrier is ATT you would look for the file called Default CARRIER ATT

Right click on the file and choose :

• <u>D</u>elete File

When you choose 'Delete File' you will get this prompt:

Delete file?		
Are you sure you wish to delete the '/System/Libra be created)	ry/CoreServices/Sprin	ngBoard.app/Default_CARRIER_VODAFONE.png' file? (A backup copy will automatically No Cancel

Click Yes.

This prompt is just making sure you want to delete this file. A backup copy will be saved in your iPhonebrowser folder.

Now use the scroll bar and scroll down until you see the file 'FSO_CARRIER_YOUR CARRIER'

• **YOUR CARRIER** = Whomever your service provider is

 Example : If your provider is TMobile you would look for the file called: FSO_CARRIER_TMOBILE
 If your carrier is ATT you would look for the file called
 FSO_CARRIER_ATT

Right click on the file and choose :

• <u>D</u>elete File

PhoneBrowner (v1.4.0.0)			
nutiona + Eàt + jeux + Go To Location +			
folders on your iPhone	Files on your Phone in the Boots Syn	y/CoreServices/SpringBoard.app' Directory	
 Ironi, Applications Apple PTP Sotter Apple PTP Apple PTP Action Action	Finance FSD_Busingsthicktive pro FSD_CARRIER_AT FSD_CARRIER_AT FSD_CARRIER_CINE FSD_SNST pro FSD_SNST pro	Stel Rie Type 633 bytes brage File 738 betes knope File 1445 bytes knope File 1445 bytes knope File 1955 bytes knope File 2955 bytes knope File 2955 bytes knope File 2955 bytes knope File 2955 bytes knope File 3953 bytes knope File	Scroll

When you choose 'Delete File' you will get this prompt:

Delete file?			<u>s</u>
Are you sure you wish to delete the '/System/Libra be created)	ry/CoreServices/SpringB	Board.app/Default_CARRIER_VODAFONE.png' file? (A b	ackup copy will automatically

Click Yes. Again, a backup will be saved in the backups folder.

Now you've deleted and backed up your existing carrier logos.

Before you add your new carrier logo you must rename them. Things to remember when renaming your new carrier logos:

• There are two of them:

- FSO_CARRIER_YOUR_CARRIER Example : If your provider is TMobile your file should be named: FSO_CARRIER_TMOBILE
- **Default_CARRIER_YOUR_CARRIER** Example : If your provider is TMobile your file should be named: **Default_CARRIER_TMOBILE**
- Note the capitalization. It has to be exact.
- Note the underscores. It has to be exact.
- The FSO file is the light colored one.
- The Default file is the dark colored one.

Now that you have your files named properly you can simply drag and drop your new carrier logos into iPhonebrowser in the same folder you deleted the original carrier logos.

That's all there is to it. If you're using a carrier other than the ones listed in the Springboard.app folder (TMobile, Cingular, ATT, Vodaphone) I'm not sure how to change that. Ask at <u>www.modmyifone.com</u> if you have any questions.
